# Preschool News

## Look at what we are up to...

Our preschool classes had a lot of fun learning about the letter R and robots this week. We each pitched in and brought fun items so that we could build our own robots. The robots turned out super neat and will be displayed in our hallway for all to see. Please stop by and check them out!

With Valentine's Day approaching we also built Valentine robots. We learned about shapes such as, rectangle, square and heart during this art project. These are also displayed in our hallway!

The afternoon class completed their letter R book and letter R tracing page. We learned about various words that start with the letter R during show and tell as well. Mrs. Mathews also read us a book about robots during library where we got to hear some more R words.

This Tuesday, Mrs. Shimek's class surprised us by reading their very own ABC books to us. We had a lot of fun learning about mystical creatures, animal facts and even hearing a Dr. Seuss ABC book. Their class did a wonderful job of reading and we hope they come back to visit us again!

## Valentine's Day

We will be having a Valentine's Day party on Thursday, February 12th for each class. This will consist of handing out Valentines, eating a snack and either playing some games or watching a Valentine's Day movie. Each child is welcome to bring a Valentine for their peers.

The morning class has 9 students and the afternoon class has 11 students. If anyone has an age appropriate Valentine movie at home they would be willing to lend us for the day let me know! Also if I could get a volunteer to make a snack and a volunteer to bring a drink for each of the classes that would be great. Let me know if
